Enivya's new dead rails video on her youtube channel

On 24th May, Anna published a video where 4 random people will play dead rails for 10,000 robux! For every 10km they go, they would get 1000 robux each and if they beat the game they will get 10,000 robux each. Four outsiders, Mick, Lucia, Ben, and Valentina. Because of their inability to work together and Mick's selfishness, there is tension and scarce resources. Valentina even gets killed once but restored to life by Lucia.

They get through in-house issues but always decide to proceed at safe spots, gaining more Robux. They encounter bandits, zombies, and vampires, and Valentina gets shot and brought back to life. In the latter part of the challenge, their cooperation becomes better. They get through the last risky fort without a hitch, gaining good resources. They ultimately win the challenge, each gaining their 10,000 Robux reward.
